

## H5 eDiscovery Services

H5 is renowned for high-quality search and technology-assisted review, but we do more so you can do less. Our suite of state-of-the-art eDiscovery processing, hosting, and production services—standalone or in conjunction with our acclaimed technology-assisted review—comes with expert project support and consultation to effectively reduce data volume, streamline workflow and create productions faster, providing you a cost-effective and risk-free eDiscovery process.

H5 eDiscovery—  
Standalone or with  
other services:

- 
**Early Case Assessment**  
Know more sooner.
- 
**Case Preparation**  
Find the evidence you need to win.
- 
**Keyword and Protocol Consulting**  
Be aligned with best practices.
- 
**Technology-Assisted Review for Production**  
Accuracy and defensibility at a lower cost.

### Whether it's for the short hop or the long haul, let the experts drive.

H5 has the experts and tools to make the eDiscovery process and our technology-assisted review integrate seamlessly. You get the benefit of each step in the workflow effectively leveraging the next.

Even if you choose a different review or hosting platform, you'll still benefit by using H5 for eDiscovery. Our search and review expertise means we can better partner with counsel to pare down ESI in order to render the smallest defensible review set, saving additional time and money.

H5 routinely works with most service providers and nearly all industry platforms. We're adept at project managing the necessary workflow among parties. No matter where the data is coming from or going to, we coordinate and document all activities so you don't have to worry that someone will drop the ball.

### WANT MORE?

#### Consider H5's premium eDiscovery solutions

##### > Managed IaaS

Need room to grow? Put yourself in our place. Be prepared for whatever comes by leveraging H5's facilities, platforms and expertise when and as you need them.

##### > Unified Matter Repository

Instead of going back to the well each time to re-collect, index and review the same data from key custodians, leverage the work you've already done. Keep data in H5's Unified Matter Repository to save time, money and get a jump on the next matter.

# Leveraging H5 Technology with the Tools of Trusted Partners

## › Benefit from Best-of-Breed Technologies

H5 leverages the well-known power and scope of Nuix and the familiarity of kCura's Relativity® to process and host data. By using these technologies along with our own, we provide our clients cutting-edge eDiscovery solutions and volume reduction while minimizing the learning curve for outside counsel. You'll get:

- Expert and dedicated project management from start to finish
- Rapid, high-volume intake to expedite workflow
- State-of-the-art processing to ensure that all data that should be read can be read
- Intelligent data reduction for fast, effective, defensible identification of non-relevant data using H5's tools and methods, executed by our experts and informed by counsel
- H5-managed hosting via Relativity for a scalable, customized review environment. (H5 is a Relativity Premium Hosting Partner)
- State-of-the-art security at our Bay Area data center

## › Features of H5 eDiscovery Solutions

### Processing Capabilities

- High-volume processing capacity to expedite workflow
- Maximized volume reduction with state-of-the-art de-duplication and sophisticated culling tools
- Full-spectrum metadata extraction and filtering capabilities, including entity and email domain extraction

- Broad spectrum file type support spanning across multiple operating systems, including support of mobile devices, forensic disk images, and other complex data sources
- Secure identification and protection of PII (e.g., Social Security and credit card numbers)
- Maximized language flexibility to identify, index, search and review Unicode/non-Unicode languages and language scripts
- Maximum text coverage for search via OCR of image based file types (via Abbyy Fine Reader).

### Hosting Capabilities via Relativity

*H5 is a Relativity Premium Hosting Partner and most H5 project managers are Relativity Certified Administrators.*

- Highly customizable and scalable environment for streamlined workflow
- Robust search capabilities (keyword, Boolean, dtSearch) for comprehensive data identification
- Ability to index, search, and review Unicode and non-Unicode languages and language scripts
- Enhanced email thread review capability
- Dynamic on-the-fly reporting for tracking reviewer and case progress and statistics
- Duplicate & near-duplicate document identification
- Multi-layer mark-up system for managing multiple production instances of the same document
- Faster review with mass tagging and propagated coding decisions based on family groups, duplicates and near-duplicates, or email threads
- Redaction propagation capabilities to accelerate second pass review activities
- Quality control consultations to ensure accurate and complete productions

## Data Security

Data security is paramount at H5. We're proud to offer our clients the full scope of security at our state-of-the-art Bay Area data center.

*(Data center specs available on request.)*

**Let H5 help you leverage each stage of the discovery process to save time, money and gain the advantage in your next litigation or investigation.**
